```c
#include<stdio.h>
#include<stdint.h>
void biOneCount()
{
    uint16_t num;
    printf("Enter a number:");
    scanf("%d",&num);
    uint16_t n=0;
    int flag=0;
    while(num>0)
    {
        uint16_t k=num%2;
        if(k==1)
        {
            printf("*");
            flag=1;
        }
        num=num/2;
    }
    if(flag==0)
    {
        printf("No set bits is Found");
    }
}
int main()
{
    biOneCount();
    return 0;
}
```
